COURSE SYLLABUS

Game Development - Field Studies A1F

7.5 credits

Course code: IT782A

Version number: 4

Valid from: 1 January 2023

Ratified by: Curriculum Committee for Informatics

Date of ratification: 15 August 2022

1. General information about the course

The course is provided by the University of Skövde and is named Game Development - Field Studies A1F (Spelutveckling - fältstudier A1F). It comprises 7.5 credits and is a second-cycle course. The level of progression is A1F.

The course is a part of the main field of study in Informatics. The disciplinary domain of the course is Technology.

2. Entry requirements

The course has the following entry requirements: passed IT736A Game Design A1N and (passed IT773A Games User Experience - Research and Development A1N or passed IT727A Serious Games - Research and Development A1N) (or the equivalent).

3. Course content

The course focuses on applied game development as it is conducted in the gaming industry. The student is given great freedom to shape the course execution itself. It is possible for students to seek contact with gaming companies to place all or part of the course time on site at a company. It is also possible for students to form an interdisciplinary team that develops a game prototype. It is crucial that the applied work is contextualized to the professional perspective, expressed through testimonials from professional developers.

4. Objectives

After completed course the student should be able to:

- give an in-depth account for the prerequisites for game development and the methods and procedures used in the gaming industry, based on own observations and testimonials from professional developers;
- critically identify and apply a scientific method in observations of game development;
- independently analyse and communicate results from game development observations;
- give an in-depth account for the disciplinary differences that are contained within a game development project;
- critically reflect on the challenges that academic research in game development is facing and
- make judgments with regard to relevant societal and ethical aspects in the study of game development.
